
full z_t
Expert
CARLA BasicAgent
Expert action a_t
steer, throttle, brake
Hidden cause. The expert brakes for something in z_t that no entry of o_t shows, so the network can only react once the car has already started to slow.
Simulator state z_t
traffic lights, destination, junction, nearby actors
privileged
imitation loss
8 values
rest of z_t dropped
Network input o_t
8 derived values
Network f_θ
MLP 8–24–16–3
