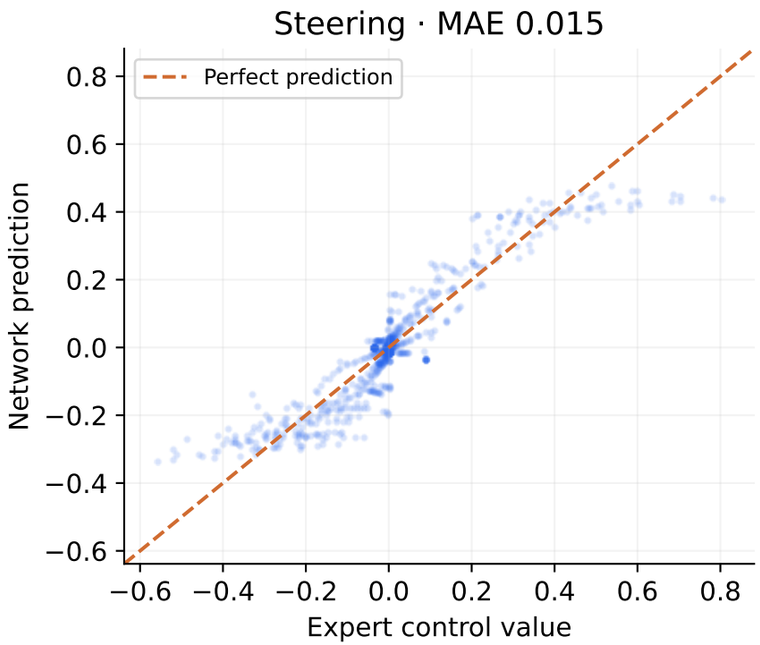
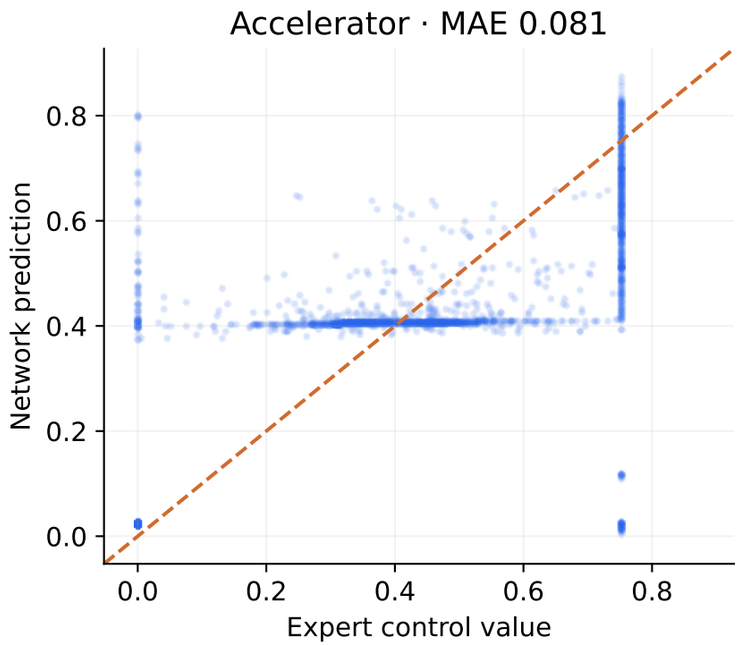
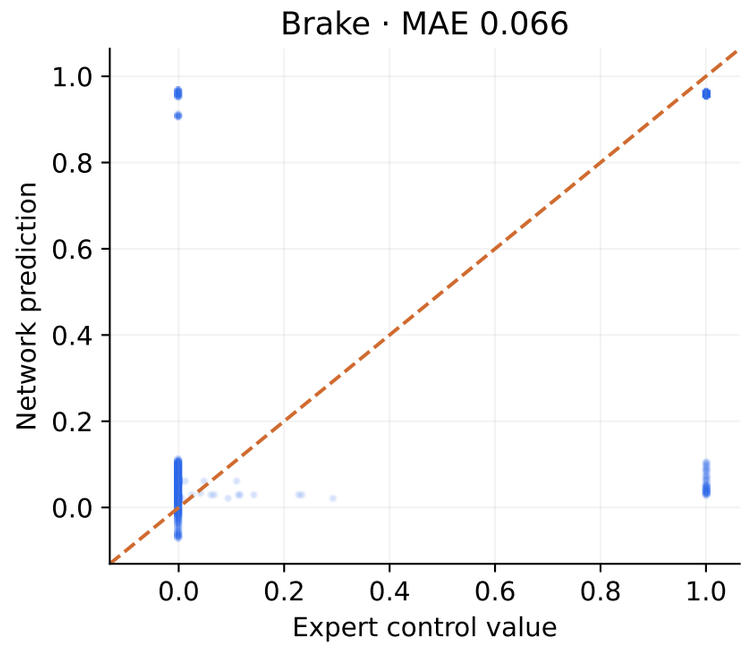
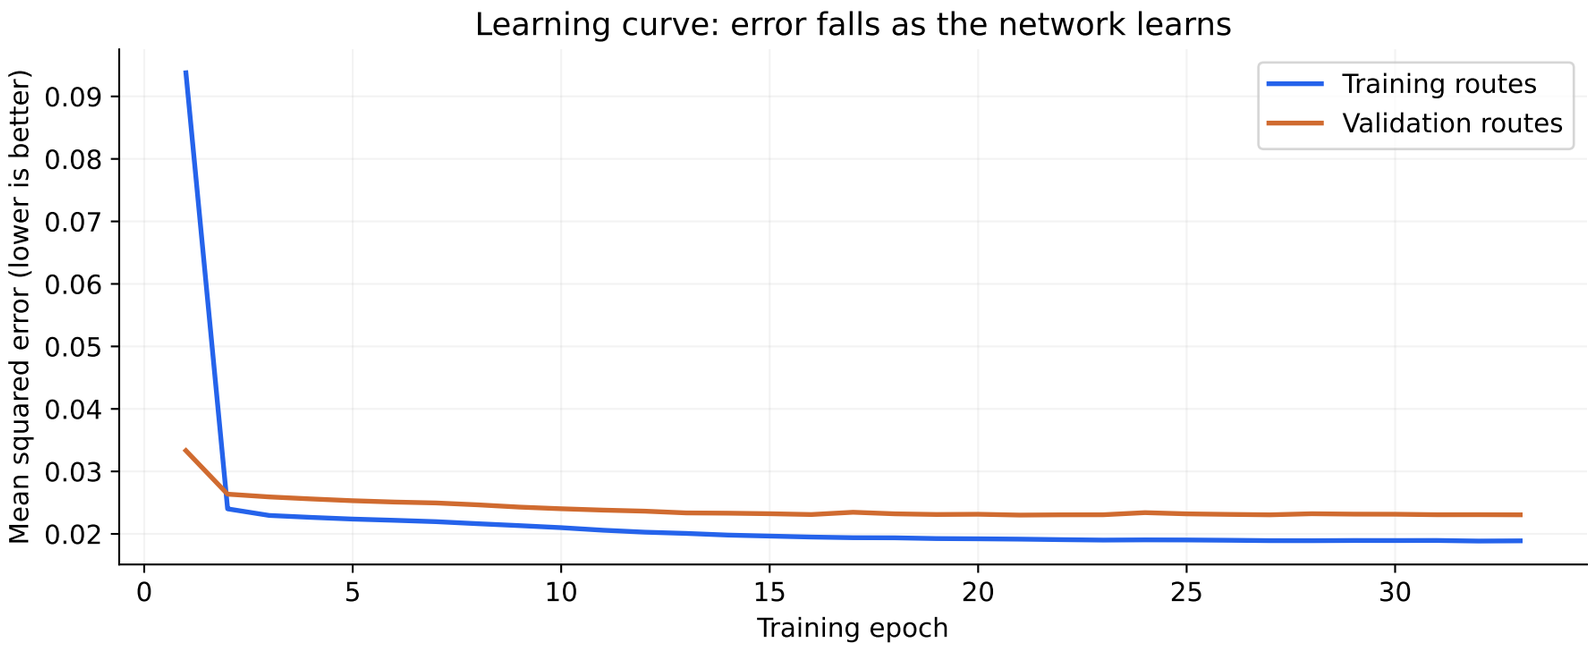
Actual results from your trained network

8 training routes / 2 validation routes / 2 test routes · Raw predictions shown without clipping









Recorded-data evaluation, not a live CARLA driving demonstration.

What this shows

Each dot is a real test sample.
Closer to the dashed line means
a closer match to the expert.

3,725 held-out test samples
2 routes unseen during training

Test MSE: 0.015713

Outputs are continuous controls.
This is nonlinear regression
using a neural network.
